  - Analysis and release certificates issuing

**A comprehensive system for Quality Control, Quality Assurance and R&D management in pharmaceutical companies.**

QCPro is a comprehensive system to manage Quality Control, Quality Assurance and R&D activities in pharmaceutical companies. The system covers all aspects of QA & QC in the production facility. This includes issuing analysis and release certificates for products, raw and packing materials. The system keeps track of product analysis types, expected and actual results. Formula and batch record for each product are stored and maintained in the system. QCPro keeps track of Instruments and laboratory equipments calibration and maintenance data. The Quality assurance module allows the follow up of each step in quality control and releases activities. QCPro is a well-proven system used by QA/QC departments in a number of the largest pharmaceutical companies in Egypt.

Follow up of each QC step
